

# Link a relative's account to your app

The GesondheetsApp lets you link to another app user's account so you can book appointments, pay invoices or share documents on their behalf.

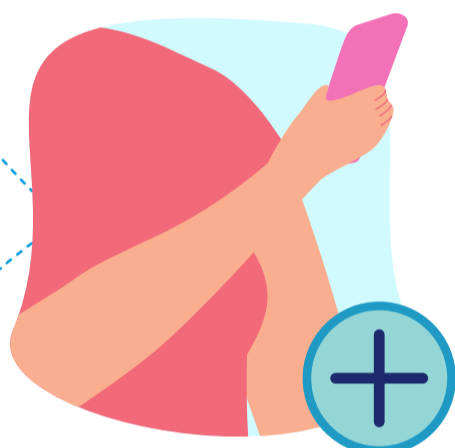

Here's how to do it.

Click on  
**'Give access to relatives'**

Click on  
**'Link relatives'**

Click on **'+'**  
to generate QR code

Click on **'+'**  
and then on **'Using the  
QR Code given by them'**

Have your phone available  
with the QR Code on the screen

Scan the QR code  
on their phone

**That's it!**

You can now book their  
appointments and share  
documents on their behalf.
